

Bug Exploit Report:

mc card394@gmail.com

1. Summary

- **Date:** 04/07/2024
- **Severity Level:** [Critical]

2. Description

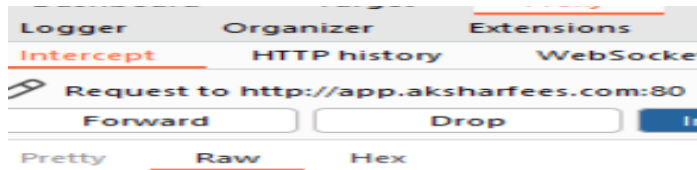

- **Bug Description:-** The payment system on the website <https://www.aksharfees.com> has been identified as vulnerable to a injection attack.
- **Impact:** The cumulative effect of these impacts can result in substantial business losses, including a decrease in customer base, loss of revenue, increased costs for incident response and remediation, and potential penalties from regulatory bodies.

3. Environment

- **System:** [Windows]
- **Browser:** [Chrome]
- **Other relevant details:** [Burpsuite Professional]

4. Steps to Reproduce

If any test accounts or data were used, ensure they are cleaned up or reported to the site administrators to avoid any lasting impact on the system.

5. Exploit Details

- **Vulnerability Type:** [E.g., SQL injection, Cross-Site Scripting (XSS), Payment Injection etc.]
- **Technical Details:** The exploitation of this vulnerability can result in direct financial losses due to fraudulent transactions and indirect losses from system downtime and recovery efforts.

6. Conclusion

- **Summary of Findings:** The findings necessitate immediate remediation actions and long-term security improvements to safeguard the system against future attacks.
- **Call to Action:** Immediate attention and action are required to address this vulnerability

Addressing this vulnerability promptly will mitigate the immediate risk and help safeguard the integrity and security of www.aksharfees.com and its users.
